Uncertain and stumbling were those infant projects but the young industry grew, first gradually displacing the old horse and cable drawn cars then as the vitality of a young giant crept through the veins of the early industry it began to reach out for new territory and greater business, until we have electrically driven passenger cars hurrying through the subways of busy cities, moving through the crowded streets, and whirring on the elevated systems of congested business districts. Intcrurban trains carry passengers and express from town to town and even the giant steam locomotive has had to admit his weakness when matched against the new electrics. Electricity has been harnessed to drive so many of the wheels of industry that it is almost impossible to live without coming...
