Excerpt: . . . 11 Because of these functional realities we have looked for alternatives that will ad-dress both security and operational concerns. The most desirable approach, in our view, would be to develop a real-time, interactive, go no-go process that would per-mit passport data to be swiped and transmitted, and an answer provided on the spot - not unlike approval of a credit-card transaction. The Australian government utilizes a process along these lines for pre-approving passengers traveling to Aus-tralia from anywhere in the world. While, without question, the scale of travel to and from the United States is orders of magnitude larger, and a U. S. system would be significantly more complex, we believe this real-time approach would be infinitely more practical than any alternative. Should that prove unworkable, however, we be-lieve that other alternatives should be explored including rolling transmissions of APIS...
