Excerpt: .to misconstruction unless the conditions affecting even these more stable constituents are clearly understood. I have, therefore, the less hesitation, as descriptive of the views which are now held by leading chemists on this subject, in quoting Dr. Frankland, himself one of the very highest authorities: -- As the result of long experience in connection with the occurrence of nitrates, nitrites, and ammonia in potable waters, I am of opinion that the presence of nitrogen in these forms in water in quantity above that which can be derived from rain, is reasonably safe and trustworthy evidence of the previous pollution of that water by animal matters. On the other hand it must not be forgotten that the absence of nitrogen in these forms is not absolutely conclusive evidence 1 Note on the Estimation of Nitric Acid in Potable Waters, by E. T.
